

Low-Profile Secure Wallmount Cabinets • Low-Profile Side Wallmount Cabinets

**Running out of space?
These low-profile cabinets fit
your cramped quarters—
and your budget.**

FEATURES

- » Space-saving vertical mounting for network devices.
- » Mount out of the way on nearly any wall or vertical surface.
- » Models with 2U, 4U, or 6U of rack space.
- » Heavy-duty steel construction.
- » Secure models have fan mounts and vented bottom for heat reduction.
- » EIA compliant.

OVERVIEW

Low-Profile Wallmount Cabinets are a dependable choice for tight networking environments and security-sensitive applications. Unique vertical racking keeps your equipment out of the way while connectors stay easily accessible.

Durable steel construction makes both models a good choice for industrial spaces and expanding businesses.

Low-Profile Secure Wallmount Cabinets

The secure models (RM352A-R2–RM353A-R2) feature a functional design that permits vertical mounting of routers and hubs in the unit.

To keep your equipment as secure as possible, the body and the top-side access cover are keyed separately so one technician could have access only to the front of the equipment while another has access to the entire cabinet. Two sets of keys are included.

The cabinets are constructed of 18-gauge steel with a black powder coating and feature an improved hinge design for added strength. The backpan has ground studs.

These models are available with 4U or 6U of rack space and provide a full 23" (58.4 cm) of usable depth. An adjustable $\frac{1}{2}$ " threaded rack rail provides a generous 1" to 4" (2.5 to 10.2 cm) space between the top cover and the equipment faces—enough space for even tough-to-fit D-ring cable managers. Cable ties are included.

To keep your equipment cool, you can mount two 4.5" fans (optional) on the bottom panel. The 115-VAC, 95-CFM fans have a smooth ball-bearing design for extra-quiet operation. Each fan includes a power cord.

Low-Profile Side Wallmount Cabinets

The Side Wallmount models, available in 2U and 4U rack sizes, are great space-savers designed for mounting networking components flat against the wall.

These cost-effective panel mounts feature a pre-installed $\frac{1}{8}$ "-thick, $\frac{1}{2}$ " threaded rack rail and backside cable lacing points. Equipment can be set back $\frac{3}{16}$ ", $1\frac{1}{2}$ ", or 3" to enable you to mount horizontal cable managers with D-rings to the rail without extending out of the rack.

The cabinets are constructed with a 16-gauge steel frame and feature keyhole mounts that enable you to mount them vertically or horizontally. A hinged cover protects your equipment.

TECH SPECS

Cabinets:

Outside Height — 29.23" (74.24 cm)

Outside Width — 26.43" (67.13 cm)

Outside Depth — RMT352A-R2: 8.63" (21.92 cm);
RMT353A-R2: 12.13" (30.81 cm)

Usable Depth — 23" (58.42 cm)

Racking Height — RMT352A-R2: 7" (17.78 cm);
RMT353A-R2: 10.5" (26.67 cm)

Rack Units (U) — RMT352A-R2: 4U;
RMT353A-R2: 6U

Weight — RMT352A-R2: 51 lb. (23.1 kg);
RMT353A-R2: 53 lb. (24 kg)

Cooling Fan:

Power — 115 VAC, 95 cfm

Size — 4.5" diameter (11.4 cm)
